

SYNICEM™

BONE CEMENT FOR CRANIOPLASTY

Perfect partner for cranial reconstruction

SYNICEM **CRANIOPLASTIE** bone cement is manufactured in-house under strictly controlled conditions using our proprietary process. Indicated for use in the reconstruction of cranial and facial bone defects of traumatic, surgical or tumour-related origin, it can be widely applied in neurosurgery, maxillofacial and plastic surgery procedures.

Designed for manual application and accurate shaping to match the bone defect, SYNICEM ensures reliable handling and consistent outcomes during complex cranial procedures.¹

High performance bone cement

- ✓ Mouldable for precise manual shaping
- ✓ Optimum working time and predictable performance
- ✓ Highest standards of quality assurance

SYNICEM CRANIOPLASTIE

Mouldable for precise manual shaping

Formulated to reach a soft, putty-like texture, allowing the surgeon to hand-shape the cement for an accurate fit to the cranial or facial defect. Suitable for modelling outside the body before final fixation, ensuring safe and controlled use during complex reconstructions.

Optimum working time and predictable performance

SYNICEM **CRANIOPLASTIE** bone cement allows sufficient time to work into position with well characterised ambient temperature-dependent setting profile.

Highest standards of quality assurance

Committed to the highest international certifications of quality, reliability and efficacy. End-to-end oversight of the design, development and manufacturing processes guarantees the highest quality at every stage.

PRODUCT	CONTENT	ORDER CODE
SYNICEM CRANIOPLASTIE	Two doses of surgical cement and 1 flat plastic film tube (Sterile plastic sleeve) Powder pouch 30g / liquid ampoule 17ml.	880115

At Biocomposites, we are proud to be driving improved outcomes across a wide range of clinical applications for patients and surgeons. Our acquisition of Synimed strengthens our portfolio of pioneering products for use in bone and soft tissue infection. Based in Keele, UK, with global operations across Europe, USA, Canada, Argentina, China and India our products are now used in over 1 million procedures every year and sold in more than 100 countries around the world.
